Independent Auditor's Report

To the Board of Directors of
Markham Stouffville Hospital

Opinion

We have audited the financial statements of the Markham Stouffville Hospital (the "Hospital"), which comprise the statement of financial position as at March 31, 2020, and the statements of operations, changes in net assets, and of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Hospital as at March 31, 2020, and the results of its operations, changes in net assets, and its cash flows for the year then ended in accordance with Canadian Public Sector Accounting Standards ("PSAS").

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Hospital in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with PSAS, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Hospital's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Hospital or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Hospital's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Hospital's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Hospital's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Hospital to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

The accompanying notes to the financial statements are an integral part of this financial statement.

1. Operations

Markham Stouffville Hospital (the "Hospital") is principally involved in providing hospital based health-care services to the southeast York Region and northwest Durham Region on two sites in Markham and Uxbridge. The Hospital is a registered charity under the Income Tax Act (Canada) and accordingly is exempt from income taxes, provided certain requirements of the Income Tax Act (Canada) are met.

The Hospital is primarily funded by the Province of Ontario in accordance with the 2008 Hospital Service Accountability Agreement and its subsequent amending agreements up to March 31, 2020, between the Hospital and the Central Local Health Integration Network.

In March 2019, the Government of Ontario passed legislation to create Ontario Health. Ontario Health has assumed the responsibility for the Central Local Health Integration Network. The Board of Directors for Ontario Health constitute the board that oversees a number of provincial agencies including all 14 Local Health Integration Networks in Ontario and Ontario Health – Cancer Care Division.

These financial statements include the assets, liabilities and activities of the Hospital. These financial statements do not include the activities of the Markham Stouffville Hospital Foundation (MSH Foundation) and Uxbridge Cottage Hospital Foundation (UCH Foundation), which are related non-controlled charitable organizations (Note 12).

2. Summary of significant accounting policies

Basis of presentation

These financial statements have been prepared by Hospital management in accordance with Canadian public sector accounting standards, including accounting standards that apply to government not-for-profit organizations.

These financial statements reflect fund accounting and separately disclose the activities of the following funds maintained by the Hospital:

Operating fund –the excess of revenue over expenses accumulated from the ongoing operations of the Hospital since its inception, less amounts invested in capital assets and internally restricted funds.

Internally restricted funds - these funds represent internally restricted funds designated by the Hospital's Board of Directors (the "Board"). Investment income earned by these funds, which is recorded in the operating fund, is also considered Board designated. The funds currently comprise an education bursary fund, which holds funds set aside by the Board to provide employees with financial support for approved educational programs.

Investment in capital assets - the resources the Hospital has invested in its capital assets, less any related unamortized capital grants and contributions.

Revenue recognition

The Hospital follows the deferral method of accounting for contributions, which include donations and government grants. Unrestricted contributions are recognized as revenue when received or receivable. Externally restricted contributions are recognized as revenue in the year in which the related expenses are incurred.

2. Summary of significant accounting policies (continued)

Revenue recognition (continued)

Under the Health Insurance Act (Ontario) and the regulations thereunder, the Hospital is funded primarily by the Province of Ontario in accordance with funding arrangements established by the Ontario Ministry of Health (the MOH) and the Central Local Health Integration Network (LHIN). Operating grants with no restrictions are recognized as revenue in the year to which they relate. Grants approved but not received at the end of year are accrued. Where a portion of a grant relates to a future year or has not been spent in accordance with the terms of the grant, it is deferred and recognized in the subsequent year. These financial statements reflect management's best estimates of funding arrangements with the MOH and LHIN. The Hospital has entered into an accountability agreement with the LHIN, which requires the Hospital to meet certain financial and non-financial performance indicators.

Investment income is recognized as revenue when earned.

Contributions received in the form of donations and grants for specific capital expenditures are initially deferred and recorded as deferred capital contributions. These deferred contributions are recognized into revenue on the same basis as the depreciation of the cost of the related capital assets.

Cash

Cash represents cash on hand and cash in the bank.

Joint ventures

Investments in jointly controlled entities are accounted for using the modified equity method, whereby the investment is initially recorded at cost and adjusted thereafter to recognize the Hospital's share of the jointly controlled entity's net surplus or deficit for its fiscal year ending within the Hospital's fiscal year.

Contributed materials and services

A number of volunteers contribute a significant amount of time each year. Due to the difficulty of determining the fair value, these contributed services are not recognized or disclosed in the financial statements and related notes. Contributed materials are recorded, when received, at fair value.

Inventories

Inventories consist primarily of hospital supplies held for patient care and are stated at the lower of cost and replacement value. Cost is determined primarily on a first-in, first-out basis.

Capital assets

Capital assets are recorded at cost. Expenditures that substantially increase the useful lives of the existing capital assets are capitalized. Renovation costs to maintain normal operating efficiency are expensed as incurred. Maintenance, repairs and minor replacements are expensed as incurred.

2. Summary of significant accounting policies (continued)

Capital assets (continued)

Depreciation is provided on a straight-line basis at annual rates based on the estimated useful lives of the assets:

Buildings	25-40 years
Furniture and major equipment	5-20 years
IT Equipment and software	3-7 years

Projects-in-progress are transferred to the appropriate capital asset category once the particular project is complete and the capital asset is ready for use. Depreciation will commence from that date on a straight-line basis over the expected useful life of the capital asset.

Impairment of long-lived assets

When conditions indicate a tangible capital asset no longer contributes to the Hospital's ability to provide services, or that the value of future economic benefits associated with the tangible capital asset is less than its net book value, the cost of the tangible capital asset will be reduced to reflect the decline in the asset's value.

Deferred grants and contributions

Deferred grants and contributions represent the unamortized portion of grants and contributions that were provided for the purchase of capital assets and certain operating expenses. Deferred contributions are recognized as revenue in the year in which the related expenditures are incurred or amortized into revenue at a rate corresponding to the depreciation rate of the related capital assets purchased with the funding. Deferred grants are recognized as revenue when the related expenses are incurred.

Pension plan

Substantially all of the employees of the Hospital are eligible to be members of the Healthcare of Ontario Pension Plan (HOOPP), which is a multi-employer best five consecutive year average pay defined benefit pension plan. Should there be a contribution deficiency in the plan, the Hospital may be required to make additional contributions to cover these deficiencies. Contributions made to HOOPP are expensed as funded, as the plan is accounted for as a defined contribution plan.

Employee future benefits

The Hospital provides certain health-care, dental, life insurance and other benefits for certain retired employees. The cost of post-employment benefits is determined using the projected benefit method pro-rated on service actuarial cost method and various assumptions. The discount rate used to determine the accrued benefit obligation was determined based on the Ontario provincial yield curve and a spread. The actuarial gains and losses are amortized over the average remaining service period of active employees. Past service costs are expensed in the period of the plan amendment.

2. Summary of significant accounting policies (continued)

Financial instruments

Financial assets and liabilities are recognized when the Hospital becomes a party to the contractual provisions of the instrument. The Hospital's financial instruments consist of cash, accounts receivable, amounts due from/to the MOH, LHIN and Ontario Health – Cancer Care Division, and accounts payable and accrued liabilities.

The Hospital's financial instruments are measured as follows:

Financial instrument	Measurement
Cash	Fair value
Accounts receivable	Amortized cost
Due from/to MOH, LHIN and Ontario Health - Cancer Care Division	Amortized cost
Accounts payable and accrued liabilities	Amortized cost

The following classification system is used to describe the basis of the inputs used to measure the fair values of financial instruments in the fair value measurement category:

Level 1 - quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 - market based inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and

Level 3 - inputs for the assets or liabilities that are not based on observable market data; assumptions are based on the best internal and external information available and are most suitable and appropriate based on the type of financial instruments being valued in order to establish what the transaction price would have been on the measurement date in an arm's length transaction.

Use of estimates

In preparing the financial statements in accordance with Canadian public sector accounting standards, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates. Accounts subject to significant estimates include accounts receivable, accrued liabilities, deferred revenue and employee future benefits.

The revenue recognized from the MOH, LHIN and Ontario Health – Cancer Care Division requires some estimation. The Hospital has entered into accountability agreements that set out the rights and obligations of the parties in respect of funding provided to the Hospital by the MOH and LHIN. The accountability agreements set out certain performance standards and obligations that establish acceptable results for the Hospital's performance in a number of areas.

If the Hospital does not meet its performance standards or obligations, the MOH and LHIN have the right to adjust funding received by the Hospital. Neither the MOH nor LHIN is required to communicate certain funding adjustments until after submission of year-end data. Since this data is not submitted until after the completion of the financial statements, the amount of MOH/LHIN funding received during a year may be increased or decreased subsequent to year-end. The amount of revenue recognized in these financial statements represents management's best estimates of amounts that have been earned during the year.

Markham Stouffville Hospital
Notes to the financial statements
 March 31, 2020

3. Cash

Cash is comprised of the following:

	2020	2019
	\$	\$
Unrestricted cash	51,987,194	55,318,669
Restricted cash for other programs (Note 13(b))	2,790,997	2,319,284
	54,778,191	57,637,953

The Hospital has available an unsecured revolving line of credit with a limit of \$15,000,000 held at the TD Commercial Bank, which bears interest at a rate of prime less 0.75%. As at March 31, 2020 \$nil (2019 - \$nil) had been drawn against this line of credit facility.

4. Investment in joint venture

The Hospital has a 50% interest in Markham Stouffville ProResp Inc. (ProResp), a supplier of home oxygen and other respiratory care products. Net investment loss of \$29,224 (net investment income of \$44,378 in 2019) has been included in the statement of operations. During the year, the Hospital provided respiratory therapy services to ProResp and charged \$36,000 (2019 - \$36,000) for its services. The Hospital provided management services in return for a management fee. Management fee income of \$87,000 (2019 - \$26,000) has been included in the statement of operations as investment income.

5. Other long-term assets

Other long-term assets comprise:

	2020	2019
	\$	\$
Deposit with the Corporation of the City of Markham (a)	1,278,500	1,278,500
Prepayment to Markham District Energy (MDE) (b)	22,602,815	23,207,500
	23,881,315	24,486,000
Less: current portion (included in prepaid expenses)	629,822	604,685
	23,251,493	23,881,315

(a) On August 21, 2009, the Hospital deposited \$1,278,500 with the Corporation of the City of Markham in lieu of a letter of credit pursuant to the Markham Stouffville Hospital site plan control agreement dated December 4, 1987, and amended August 21, 2009. The deposit accrues interest at the prime rate less 1.75% and will be returned to the Hospital on satisfactory completion of the Markham site expansion project and related site works.

5. Other long-term assets (continued)

(b) On September 1, 2012, the Hospital entered into a 30-year Energy Services Agreement (ESA) with Markham District Energy (MDE) for the supply, sale and delivery of energy services to the Hospital. MDE is a non-related party. Under the terms of the ESA, the Hospital was required to provide an upfront contribution, which will reduce fixed capacity charges over the life of the ESA.

The total prepayment, including unrecoverable harmonized sales tax (HST), was \$26,628,661 and is amortized to other supplies and expenses on a monthly basis in accordance with a fixed capacity cost avoidance schedule provided by MDE.

6. Capital assets

	Cost \$	Accumulated depreciation \$	2020 Net book value \$	2019 Net book value \$
Land	8,287,625	—	8,287,625	8,287,625
Buildings	391,640,530	111,015,929	280,624,601	290,916,115
Furniture and major equipment	57,171,617	42,776,102	14,395,515	15,938,301
IT Equipment and software	13,994,267	7,436,116	6,558,151	8,149,675
Projects-in-progress	13,662,312	—	13,662,312	4,151,212
	484,756,351	161,228,147	323,528,204	327,442,928

Projects-in-progress

Projects-in-progress includes costs for several IT projects related to system implementation and enhancing financial infrastructure totaling \$2,164,469 (2019 - \$453,184), redevelopment costs related to implementing facility development of \$1,418,830 (2019 - \$468,423), and other costs related to ongoing capital projects and equipment of \$10,079,013 (2019 - \$3,229,605).

7. Deferred grants and contributions

Deferred grants and contributions related to capital assets represent the unamortized and unspent amounts of donations and grants received for prepaid expenses and the purchase of capital assets.

	2020 \$	2019 \$
Balance, beginning of year	298,576,342	301,663,460
Amortized to revenue during the year	(12,599,721)	(13,023,366)
Amount received during the year	11,189,052	9,936,248
Balance, end of year	297,165,673	298,576,342
Deferred grants and contributions comprise		
Grant received for long-term prepaid expense (Note 5)	20,581,036	21,132,101
Grants and contributions for capital assets	276,584,637	277,444,241
	297,165,673	298,576,342

8. Employee future benefits

Pension plan

The Hospital is a member of the Healthcare of Ontario Pension Plan ("HOOPP"), which is a multi employer defined benefit pension plan. HOOPP members will receive benefits based on the length of service and on the average of annualized earnings during the five consecutive years prior to retirement, termination or death, which provide the highest earnings.

The HOOPP's assets consist of investment grade securities. Market and credit risk on these securities are managed by the HOOPP by placing plan assets in trust and through the HOOPP investment policy.

Pension expense is based on HOOPP management's best estimates, in consultation with its actuaries, of the amount, together with the 6.9% of annualized earnings contributed by employees (9.2% of annualized earnings above the respective year's maximum pensionable earnings), required to provide a high level of assurance that benefits will be fully represented by fund assets at retirement, as provided by the HOOPP. The funding objective is for employer contributions to the HOOPP to remain a constant percentage of employee's contributions. The employer currently contributes 126% of the employee's contribution.

Substantially all the employees of the Hospital are members of HOOPP. Contributions to HOOPP made during the year by the Hospital on behalf of its employees amounted to \$11,769,102 (2019 - \$10,833,256) and are included in employee benefits expense or special programs expense, as appropriate, in the statement of operations.

Other employee future benefits

Certain employees of the Hospital are entitled to certain post-employment benefits. The Hospital recognizes the present value of its obligation from these benefits as they are earned. The most recent actuarial valuation of the obligation was performed as at March 31, 2020.

Expenses relating to other employee future benefits are included in employee benefits expense in the statement of operations.

The movement in the liability during the year is as follows:

	2020	2019
	\$	\$
Accrued benefit obligation, beginning of year	4,046,600	3,607,100
Current service cost	323,000	300,500
Interest cost	139,400	134,300
Benefits paid	(162,900)	(140,900)
Net actuarial losses	750,400	145,600
Accrued benefit obligation, end of year	5,096,500	4,046,600
Unamortized net actuarial experience (losses)	(1,200,900)	(507,500)
Accrued benefit liability, end of year	3,895,600	3,539,100

	2020	2019
	\$	\$
Employee future benefits expense		
Accrual for services	323,000	300,500
Interest on accrued benefits	139,400	134,300
Amortization of net actuarial losses	57,000	57,000
Net benefit expense	519,400	491,800

8. Employee future benefits (continued)

Other employee future benefits (continued)

The significant actuarial assumptions adopted in measuring the Hospital's employee future benefit liability for pension and other post-retirement benefit plans are as follows:

	2020	2019
Discount rate for calculation of net benefit costs	3.25%	3.25%
Dental benefit cost escalation	4.50%	4.00%
Expected average remaining life to retirement	14.6 years	13.6 years
Extended health-care trend rates	See (a)	See (b)

- (a) Drugs: 6.0% per year in 2020 grading down over 20 years to an ultimate rate of 4.00% per year. Other Medical and Hospital: 4.00% per year. Vision: 0.00% per year.
- (b) Drugs: 7.0% per year in 2017 grading down over 20 years to an ultimate rate of 4.00% per year. Other Medical and Hospital: 4.00% per year. Vision: 0.00% per year.

9. Contingencies and commitments

- (a) From time to time, the Hospital is named in lawsuits related to its activities. It may not be possible to determine the merits of these claims or to estimate the possible financial liability, if any, to the Hospital. Accordingly, no provision for loss has been made in these financial statements. In management's view, these claims should not have a material adverse effect on the financial position of the Hospital.
- (b) The Hospital is a member of the Healthcare Insurance Reciprocal of Canada (HIROC) and therefore has an economic interest in HIROC. HIROC is a pooling of the public liability insurance risks of its hospital members. All members of the HIROC pool pay annual premiums, which are actuarially determined. All members are subject to assessment for losses, if any, experienced by the pool for years in which they were members. No assessments have been made for the year ended March 31, 2020.

Since its inception in 1987, HIROC has accumulated an unappropriated surplus, which is the total of premiums paid by all subscribers plus investment income, less the obligation for claims reserves and expenses and operating expenses.

- (c) Through to June 23, 2017, the Hospital was an equity member of the Central Ontario Healthcare Procurement Alliance (COHPA), a not-for-Profit shared service organization that has centralized contract management and purchasing/accounts payable transactions. As of June 23, 2017, COHPA integrated with Plexxus, another not-for-profit shared service organization. The equity membership in COHPA was dissolved and the Hospital now purchases services from Plexxus as a shared services customer. The Hospital letter of guarantee related to security of the TD Bank Financial Group loan on behalf of COPHA, dated February 4, 2009 has been discharged. During the year, the Hospital paid \$1,275,159 (2019 - \$1,275,159) in purchased service fees.

10. Investment in capital assets

The fund balance invested in capital assets is calculated as follows:

	2020	2019
	\$	\$
Capital assets (Note 6)	323,528,204	327,442,928
Deferred grants for capital assets (Note 7)	(276,584,637)	(277,444,241)
	46,943,567	49,998,687

11. Internally restricted funds

Internally restricted funds consist of the Education Bursary Fund, which was established by the Board of Directors for the purpose of funding further education and professional development opportunities for Hospital staff. The fund utilizes only realized gains and interest earned above the initial allocation. During the year, investment income of \$47,474 (2019 - \$36,071) was recorded in the internally restricted fund.

12. Related party transactions

- (a) The Hospital is related to the MSH Foundation and the UCH Foundation. Both foundations raise funds to support capital, education and other specific projects of the Hospital. Both foundations are incorporated without share capital under the laws of the Province of Ontario and are charitable organizations registered under the Income Tax Act (Canada). The Hospital is considered to have significant influence over both foundations due to the common directors on the boards, but does not have control. As a result, these financial statements do not include the assets, liabilities, and activities of the foundations, which, although related to the Hospital, are not controlled by it.
- (b) During the year, the Hospital received from the MSH Foundation \$5,147,637 (2019 - \$5,105,502) for the purchase of capital assets, which is included in deferred grants and contributions for the year. In addition, the Hospital received \$647,054 (2019 - \$262,395) of operating grants, which are included as other income in the statement of operations. Included in accounts receivable is \$18,633 (2019 - \$15,602) due from the MSH Foundation as a reimbursement of costs paid or payable on behalf of the MSH Foundation. The Hospital provides the MSH Foundation's premises on a rent free basis, the value of which has not been recorded in these financial statements. In turn, the MSH Foundation, in its ongoing fundraising activities, provides the Hospital with public relations services, the value of which has not been recorded in these financial statements. These transactions were in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.
- (c) During the year, the Hospital received \$282,220 (2019 - \$325,550) from the UCH Foundation for the purchase of capital assets, which is included in deferred grants and contributions. The Hospital received \$nil (2019 - \$66,141) of operating grants, which is included as other income in the statement of operations. Included in accounts receivable is \$136,503 (2019 - \$90,341) due from the UCH Foundation purchase of capital assets and as a reimbursement of costs paid or payable on behalf of the UCH Foundation.

13. Special programs and other programs

- (a) Special programs include programs funded by the MOH, the Ministry of Community, Family and Children's Services, the Regional Municipality of York and the University of Toronto.
- (b) Other programs are those programs where the Hospital acts as paymaster on behalf of the MOH or LHIN. These programs include Midwifery Services of Durham and other consultancy services. As the Hospital is the paymaster for these programs, no amounts are recorded on the statement of operations. Gross funding and payments related to these items are:

	2020	2019
	\$	\$
Funding	3,612,073	3,449,534
Payments	(3,612,073)	(3,449,534)
	—	—

14. Risk management

Financial risks

The Hospital is exposed to a variety of financial risks, including credit risk and liquidity risk. The Hospital's overall risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Hospital's financial performance.

Credit risk

Credit risk arises from cash held with financial institutions, and credit exposures to customers on outstanding accounts receivable balances. The Hospital does not have any significant past due accounts receivable that are not provided for. The maximum exposure to credit risk is equal to the carrying value of the financial assets. The objective of managing counterparty credit risk is to prevent losses in financial assets. Cash is held at a major financial institution that has a high credit rating assigned to it by international credit rating agencies, minimizing any potential exposure to credit risk.

Liquidity risk

Liquidity risk is the risk the Hospital will not be able to meet its financial obligations when they come due. The Hospital manages its liquidity risk by forecasting cash flows from operations and anticipating investing and financing activities and maintaining credit facilities to ensure it has sufficient funds to meet current and foreseeable financial requirements.

The table below is a maturity analysis of the Hospital's financial liabilities:

	Up to 6 months	More than 6 months up to 1 year	More than 1 year up to 5 years	More than 5 years	Total
	\$	\$	\$	\$	\$
Accounts payable accrued liabilities	31,588,398	4,062,536	—	—	35,650,934
Due to MOHLTC, LHIN and Cancer Care Ontario	—	15,026,193	—	—	15,026,193

14. Risk management (continued)

Fair value hierarchy

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into Levels 1 to 3 based on the degree to which the fair value is observable:

The following table presents the financial instruments recorded at fair value in the Statement of financial position, classified using the fair value hierarchy described above:

	Level 1 \$	Level 2 \$	Level 3 \$	2020 Total \$
Cash	54,778,191			54,778,191
	54,778,191	—	—	54,778,191
	Level 1 \$	Level 2 \$	Level 3 \$	2019 Total \$
Cash	57,637,953	—	—	57,637,953
	57,637,953	—	—	57,637,953

15. Pandemic response

On March 11, 2020, the World Health Organization characterized the outbreak of a strain of the novel corona virus (“COVID-19”) as a pandemic which has resulted in a series of public health and emergency measures that have been put into place to combat the spread of the virus.

As a result of the COVID-19 pandemic, the Hospital experienced a change in the demand for its services and incurred unbudgeted pandemic response expenditures. The Hospital has tracked expenditures related to its pandemic response and will apply for reimbursement of hospital-incurred expenditures once Provincial processes for such reimbursement are finalized. Any recoveries that may be received in the future will be recognized in the period in which approval is obtained.

The duration and impact of the COVID-19 pandemic is unknown at this time and it is not possible to reliably estimate the impact that the severity and length of the pandemic will have on the financial results and condition of the Hospital in future periods.

16. Comparative figures

Certain prior year comparative figures have been reclassified to conform to the current year’s financial statement presentation. The reclassifications relate primarily to the reclassification of IT equipment and software in Note 6 to the financial statements from the furniture and major equipment component of capital assets.
